Dear Resident

Re Improvements to Setley Gardens

Bournemouth Borough Council has received funds to improve 22 play areas across Bournemouth as part of the Playbuilder programme (managed by Play England). Playbuilder is a government funded programme to improve children's play nationally. Setley Gardens will be part of the year one playgrounds to be improved under this programme, boosted by funds that have been raised by local community groups.

The Playbuilder programme emphasises that the children should be at the heart of the design of these play spaces. After extensive discussions with local children the results are shown in the design which you can see on the reverse of this letter. These improvements have also been developed in partnership with local residents, council staff from parks, countryside and housing alongside the police. We hope the project will provide a successful, safe, accessible and exciting space for local children and young people. Our aim is to start work in early 2010.

If you have any questions regarding this please email us at parks@bournemouth.gov.uk or write to the above address or phone 01202 437812.

Yours sincerely

Tom Notley
Landscape Manager
